

Certified Professional Food Manager Course

Indiana Code 410-IAC7-22 requires mandatory certification of at least one person who oversees the food safety operation within each establishment. Ivy Tech offers an instructor-led certification training course for the certified professional food manager. This course will prepare individuals to take and pass the 85-question, multiple choice exam. Upon successful completion of the certification exam, students will be awarded certification and their name will be added to the National Registry of Food Managers.

The certification is valid for five years. Exams must be scheduled within 14 days of the end of the course. Course fee includes manual, supplemental training materials and exam. Class location and schedule may change based on class size.
